

Run & Sign In

The demo covers three core warehouse workflows: Putaway, Picking, and Returns inspection. All workflows use barcode scanning and simulate warehouse operations.

What to do

- 1 Open WMS.xcodeproj in Xcode 26 or later.
- 2 An iPhone is preferred for using the barcode scanner because Apple simulators do not provide camera access. In the simulator, use "Demo mode". It has two buttons to simulate an invalid and a successful scan. Enable it from the top-right menu anywhere a scanner is available.
- 3 Choose a device and run the WMS scheme. For iPhone, first select your Team in Signing & Capabilities (change the Bundle ID if needed).
- 4 On iPhone, allow the app to access the camera.
- 5 Scan your badge.
- 6 Open the "Operations" tab.

Putaway

Put away the items from the container into the bins you choose.

What to do

- 1 Open “Operations” → “Putaway” and get a task.
- 2 Scan the container from the task.
- 3 Scan any available bin.
- 4 Scan the items you are putting into this bin.
- 5 A bin holds 3 items — then tap “Switch bin” and scan another bin.
- 6 Continue until all items are put away.
- 7 Finish the task and submit the results.

Picking

Pick the items in the order shown by the app.

What to do

- 1 Open “Operations” → “Picking” and get a task.
- 2 Check the current item’s name and storage location.
- 3 Scan this item’s barcode.
- 4 The app will show the next item — keep scanning until the list is complete.
- 5 On the final screen, tap “Complete task”.

DONE

All items in the task have been picked.

Items

Scan from top to bottom.

Returns inspection

Link the totes and choose a decision for each returned item.

What to do

- 1 Open “Operations” → “Returns inspection” and get a task.
- 2 Scan the returns tote from the task.
- 3 Link the “Sellable” and “For inspection” totes using the barcodes below.
- 4 Start inspection and scan any item.
- 5 To test the functionality, choose different decisions: “Sellable”, “Defective”, or “Wrong item”.
- 6 For “Defective” and “Wrong item”, take a photo. In Demo mode, the photo is inserted automatically.
- 7 Inspect the remaining items in any order.
- 8 Finish the task and submit the results.
